

RH RECESSED FAN HEATERS

What is a Recessed Fan Heater?

A discreet heater that lives in plasterboard ceilings and creates a warm welcome for staff and customers in commercial premises such as shops, cafes and entrance areas. Recessed ceiling heaters free up valuable wall space and only require a shallow 200mm clearance above a ceiling.

Key Features

- Air inlet and outlet through front panel
- Simple fixing through front face of heater
- Only 200mm clearance required above ceiling
- Can be controlled by CS-7 controller and/or suitably rated thermostat (2kW: 10A, 3kW: 16A, 6kW: 10A)
- For multi-heater installations see SystemX (page 26-27)

Energy Saving Tip

Installing a CS-7 switch gives you a low heat option which reduces your electricity consumption (ideal for warmer months).
