

RP RADIANT CEILING PANELS

What is a Radiant Ceiling Panel?

A discreet energy efficient space heating solution for commercial premises such as offices, classrooms and care homes. Radiant panels free up wall space and can either slot into a grid ceiling or be surface mounted with the brackets supplied as standard.

Key Features

- Radiant heat without light output
- Quick and easy installation into a standard (24mm) suspended ceiling grid
- Bracket provided for easy mounting onto a conventional ceiling
- Attractive white easy-clean finish (RAL9010)
- IP44 rated

Energy Saving Tip

Radiant panel's radiant effect makes you feel warmer than the actual ambient air temp. This means you can set your thermostat 3-4°C lower.

Heaters

Model	kW
RP3-03	0.3
RP3-06	0.6

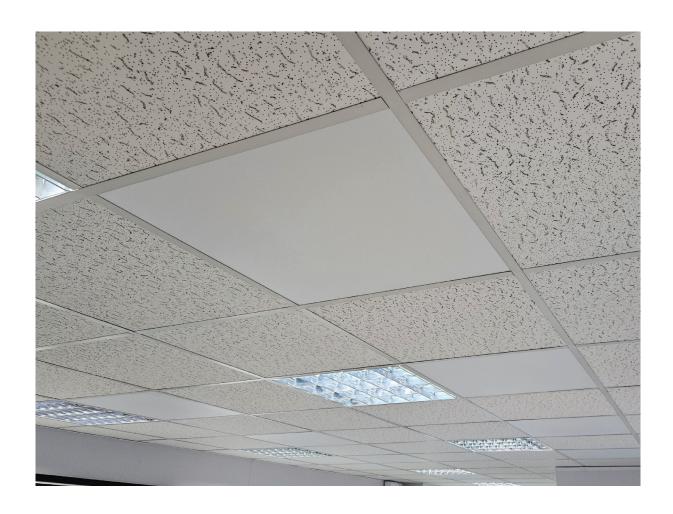

Technical

Model	kW	Volts	Dimensions (mm)		Recommended Mounting Height (m)		Weight (kg)
