

SystemX CEILING GRID FAN HEATERS

What is a **SystemX** Ceiling Grid Heater?

A staple product when heating larger commercial premises with 600 x 600 grid ceilings. Multiple SystemX ceiling grid heaters can be daisy chained from one simple to use controller as per the diagram below. Control connections are all made with Cat5 cable making for a quick, error free install.

Key Features

- Control up to 12 heaters from a single point
- Designed to rest in the T bar of a 600 x 600 suspended ceiling
- White egg-crate grille supplied as standard
- Low profile design – only 200mm clearance required above grid
- All control connections by Cat5 cable for quick error-free installation
- Controllers do not require their own 230V supply
- BMS compatible using CX-BMS module
- Can be controlled in a group with any other style of SystemX heater

Energy Saving Tip

Control with a 7-day programmable thermostat to keep your running costs to an absolute minimum.
